

VACANCY: OPERATION AND MAINTENANCE MANAGER

MBB Consulting Engineers Operation and Maintenance (O&M) division has a vacancy for an O&M Manager at its Hoedspruit office.

The Hoedspruit office is primarily responsible for the Operation and Maintenance of the Blyde River Water Distribution Network, a gravity pipe network comprising 120km pipelines with diameters ranging from 1500mm to 300mm, several large pressure control stations, 243 offtake points, and a complex SCADA monitoring and control system. MBB is responsible for the complete O&M of the project, including monthly invoicing, stock control, scheduled and unscheduled maintenance to infrastructure and servitudes, all repairs and maintenance of the SCADA system, etc.

The ideal candidate will be practical and hands-on, with experience in the design and O&M of hydraulic infrastructure. He will be responsible for the day to day management of the Hoedspruit operation. Emphasis will be on compiling and managing the execution of maintenance schedules, quality control, stock control, planning and approving of purchases, etc. He will also be the first contact for customers of the network that require pressure & flow setting information, want to amend contracts on the network, or any other client relationship requirements. The successful candidate will take ultimate responsibility of the office expenditure, and operational settings.

Who should apply: Mature candidates with a qualification in Civil or Agricultural Engineering, or with substantial experience in the operation and maintenance of similar water related infrastructure. A reliable, practical hands on person with managerial and leadership skills is required to complement the existing project team. A candidate with the qualification and experience to serve the farming community in Hoedspruit with irrigation designs and consulting services will have an additional advantage. Please forward your CV to Org van Rensburg: org@mbbnel.co.za.
